AS in Electronics Engineering
Technology

PROFILE

Information Technology student at University of Missouri – Columbia, trying to pursue a career in IT. My goal is to help Hitachi Energy with their IT/OT support and further my career in the Information Technology field.

EXPERIENCE

Maintenance Electrician

2018-Present

Examine, Troubleshoot, Design & Repair AC/DC electronic and/or electrical circuits, Including remote control, industrial controls, PLC, CNC and Robot computers/ processors. Perform electrical layouts and install production equipment and perform repairs or replacements as required. Modify and edit machine language programs. Setup computer systems and install various software systems.

Electronics Technician

2017-2018

Installing and maintaining HVAC control systems in a multitude of businesses. Troubleshoot low voltage systems, verifying operation of controls on site, verifying communication to remote site from office.

Artillery Sensor Support Marine

2011-2015

Assist in the delivery of accurate artillery fires and prosecution of counter fire fight by developing weather data for artillery ballistic computations, performing survey operation. Duties include preparing and operating weather observation equipment such as theodolites and surface sensors, measuring atmospheric readings; preparing and operating survey equipment such as inertial navigation systems, global positioning system receivers, theodolites and electronic distance measuring equipment. Additionally, the 0847 will prepare and operate acoustic sensors for employment. Other duties include operating computer systems for computations, digital communications, command and control, and imagery development.
